International Law from Below Development, Social Movements and Third World Resistance

Balakrishnan Rajagopal

The emergence of transnational social movements as major actors in international politics - as witnessed in Seattle in 1999 and elsewhere - has sent shockwaves through the international system. Many questions have arisen about the legitimacy, coherence and efficiency of the international order in the light of the challenges posed by social movements. This ground-breaking book offers a fundamental critique of twentieth-century international law from the perspective of Third World social movements - the first ever to do so. It examines in detail the growth of core key components of modern international law - international institutions and human rights - in the context of changing historical patterns of Third World resistance. Using a historical and interdisciplinary approach, Rajagopal presents compelling evidence challenging current debates on the evolution of norms and institutions, the meaning and nature of the Third World, as well as the political economy of its involvement in the international system.

HUMAN RIGHTS

International Human Rights Law Cases, Materials, Commentary

Olivier De Schutter

How do you keep students motivated when their perception of a subject conflicts with the reality of its academic study? International human rights law, unquestionably an exciting field, is also complex and demanding. With his breakthrough textbook, De Schutter focuses on international human rights law as global legal system, rather than as a collection of different (though related) rights, giving it relevance and immediacy. Drawing on cases and materials from a wide range of sources, it shows how human rights law is used as a tool to address contemporary issues such as counter-terrorism, global poverty and religious diversity. Materials are organised thematically, allowing readers to make comparisons and connections between different legal treaties and systems. Students can also easily assess how human rights are protected under domestic and international laws. The law is placed in context throughout, ensuring full understanding of why laws exist and how they work.

Human Rights and Law Bonded Labour in India

Ramesh Kumar Tiwari

Human Rights and Law: Bonded Labour in India deals with the problem of debt bondage and the way it has been treated during the British as well as in the post-independence period. Analysis has been made of the motivations for carrying out the reform; the processes involved in formulating the legislation, contributions by different agencies, discussion in the parliament, etc. The two legislations: the Indian Slavery Act, 1843 and bonded labour system (Abolition) Act, 1976 provide a comparative perspective in the making of social legislation in two different historical settings and different political systems. The statute on debt and its enforcement has been carried out by four distinct political authorities. India under the Company, India under the Crown; Provincial Governments (1937–1939); and Independent India. The problems in the enforcement of the statutes have been analyzed drawing evidence from modern Indian history, state-society relationship, motivations of the officials and the political context of administration.

Inside Lawyers' Ethics

Christine Parker
& Adrian Evans

Legal ethics is often described as an oxymoron or contradiction in terms – lay people find the concept amusing and lawyers can find ethics impossible. The best lawyers are those who have come to grips with their own values and actively seek to improve their ethical practice. This book is designed to help law students and new lawyers understand and modify their own ethical priorities, not just because this knowledge makes it easier to practice law and earn an income, but because self-aware, ethical legal practice is right and feels better than anything else. Packed with case studies of ethical scandals and dilemmas from real life legal practice in Australia, each chapter delves into the most difficult issues lawyers face. From lawyers' part in corporate fraud to the ethics of time-based billing, Parker and Evans expose the values that underlie current practice and set out the alternatives ethical lawyers might follow.

LEGAL SKILLS

Modern Legal Drafting A Guide to Using Clearer Language

Second Edition

Peter Butt
& Richard Castle

In the second edition of this highly regarded text, the authors show how and why traditional legal language has developed the peculiar characteristics that make legal documents inaccessible to the end users. Incorporating recent research and case law, the book provides a critical examination of case law and the rules of interpretation. Detailed case studies illustrate how obtuse or outdated words, phrases and concepts can be rewritten, reworked or removed altogether. Particularly useful is the step-by-step guide to drafting in the modern style, using examples from four types of common legal documents: leases, company constitutions, wills and conveyances. Readers will gain an appreciation of the historical influences on drafting practice and the use of legal terminology. They will learn about the current moves to reform legal language, and receive clear instruction on how to make their writing clearer and their legal documents more useful.

CONTRACT LAW

Contract Law

Neil Andrews

This textbook takes a fresh approach to contract law; as a first edition it reflects the subject in the 21st century more accurately than other texts. Comprehensive and scholarly, it maps the curriculum perfectly but detailed references and further reading sections encourage students to explore the subject further. Understanding is paramount and chapter introductions clearly guide students through the material. The textbook takes an innovative approach to case law: breaking down and discussing individual elements of a case and selecting short key extracts it gives students the tools to read cases independently and with confidence. An examination of the historical and theoretical foundations of the subject and a concluding chapter tracking emerging fields ensure the broadest possible perspective. Discussion of key recent cases such as Durham Tess Valley Airport (2010) and Chartbrook (2009) make this important new text a must for contract law students.

The Health of Nations Society and Law Beyond the State

Philip Allott

The human world is changing. Old social structures are being overwhelmed by forces of social transformation which are sweeping across political and cultural frontiers. A social animal is becoming the social species. The animal that lives in packs and herds (family, corporation, nation, state...) is becoming a member of a human society which is the society of all human beings, the society of all societies.

The age-old problems of social life - religious, philosophical, moral, political, legal, economic - must now be addressed at the level of the whole species, at the level where all cultures and traditions meet and will contribute to an exhilarating and hazardous new form of human self-evolving.

Trade Marks and Brands An Interdisciplinary Critique

Lionel Bently,
Jennifer Davis &
Jane C. Ginsburg

Developments in trade marks law have called into question a variety of basic features, as well as bolder extensions, of legal protection. Other disciplines can help us think about fundamental issues such as: what is a trade mark? What does it do? What should be the scope of its protection? This volume assembles essays examining trade marks and brands from a multiplicity of fields: from business history, marketing, linguistics, legal history, philosophy, sociology and geography. Each chapter pairs lawyers' and non-lawyers' perspectives, so that each commentator addresses and critiques his or her counterpart's analysis. The perspectives of non-legal fields are intended to enrich legal academics' and practitioners' reflections about trade marks, and to expose lawyers, judges and policy-makers to ideas, concepts and methods that could prove to be of particular importance in the development of positive law.

The Spirit of Hindu Law

Donald R. Davis, Jr.

Law is too often perceived solely as state-based rules and institutions that provide a rational alternative to religious rites and ancestral customs. *The Spirit of Hindu Law* uses the Hindu legal tradition as a heuristic tool to question this view and reveal the close linkage between law and religion. Emphasizing the household, the family, and everyday relationships as additional social locations of law, it contends that law itself can be understood as a theology of ordinary life. An introduction to traditional Hindu law and jurisprudence, this book is structured around key legal concepts such as the sources of law and authority, the laws of persons and things, procedure, punishment and legal practice. It combines investigation of key themes from Sanskrit legal texts with discussion of Hindu theology and ethics, as well as thorough examination of broader comparative issues in law and religion.

Hinduism and Law An Introduction

Timothy Lubin, Donald R. Davis Jr. & Jayanth K. Krishnan (editors)

Covering the earliest Sanskrit rulebooks through to the codification of 'Hindu law' in modern times, this interdisciplinary volume examines the interactions between Hinduism and the law. The authors present the major transformations to India's legal system in both the colonial and post colonial periods and their relation to recent changes in Hinduism. Thematic studies show how law and Hinduism relate and interact in areas such as ritual, logic, politics, and literature, offering a broad coverage of South Asia's contributions to religion and law at the intersection of society, politics and culture. In doing so, the authors build on previous treatments of Hindu law as a purely text-based tradition, and in the process, provide a fascinating account of an often neglected social and political history.

Adjudication in Religious Family Laws

Cultural Accommodation, Legal Pluralism, and Gender Equality in India

Gopika Solanki

How do multireligious and multiethnic societies construct accommodative arrangements that can both facilitate cultural diversity and ensure women's rights? Based on a rich ethnography of adjudication of marriage and divorce across formal and informal areas in Mumbai, this book argues that the shared adjudication model in which the state splits its adjudicative authority with religious groups and other societal sources in the regulation of marriage can potentially balance cultural rights and gender equality. In this model, the ideologically diverse lay, civic, and religious sources of legal authority construct, transmit, and communicate heterogeneous notions of the conjugal family, gender relations, and religious membership within the interstices of state and society. In so doing, they fracture the homogenized religious identities grounded in hierarchical gender relations within the conjugal family. The shared

adjudication model facilitates diversity as it allows the construction of hybrid religious identities, creates fissures in ossified group boundaries, and provides institutional spaces for ongoing intersocietal dialog. In this pluralized legal sphere, individual and collective legal mobilization by women spurs law reform and paves the way toward formal and substantive gender equality.

An Introduction to Islamic Law

Wael B. Hallaq

The study of Islamic law can be a forbidding prospect for those entering the field for the first time. Wael Hallaq, a leading scholar and practitioner of Islamic law, guides students through the intricacies of the subject in this absorbing introduction. The first half of the book is devoted to a discussion of Islamic law in its pre-modern natural habitat. The second part explains how the law was transformed and ultimately dismantled during the colonial period. In the final chapters, the author charts recent developments and the struggles of the Islamists to negotiate changes which have seen the law emerge as a primarily textual entity focused on fixed punishments and ritual requirements. The book, which includes a chronology, a glossary of key terms, and lists of further reading, will be the first stop for those who wish to understand the fundamentals of Islamic law, its practices and history.

Sharia Theory, Practice, Transformations

Wael B. Hallaq

In recent years, Islamic law, or Shari'a, has been appropriated as a tool of modernity in the Muslim world and in the West and has become highly politicised in consequence. Wael Hallaq's magisterial overview of Shari'a sets the record straight by examining the doctrines and practices of Islamic law within the context of its history, and by showing how it functioned within pre-modern Islamic societies as a moral imperative. In so doing, Hallaq takes the reader on an epic journey tracing the history of Islamic law from its beginnings in seventh-century Arabia, through its development and transformation under the Ottomans, and across lands as diverse as India, Africa and South-East Asia, to the present. In a remarkably fluent narrative, the author unravels the complexities of his subject to reveal a love and deep knowledge of the law which will inform, engage and challenge the reader.

Between God and the Sultan A History of Islamic Law

Knut S. Vikor

Today's discussions on Islam and the place religion should have in society often lead to questions about the Shari'a, Islamic law. Those who work for a political role for Islam demand that the Shari'a must be applied in their country, while those critical of Islam use the law as proof of its 'medieval' character. Islam is sometimes, not quite justly, called a 'religion of rules', and the rules of Islam are the Shari'a. But it is often hard to establish the exact nature of this law in more practical terms. Asking those who favour it or those who oppose it may only lead to greater confusion. Often a rule and its exact opposite can both be said to be 'what the Shari'a says' and what God demands of the believer. It may even be questioned if there is any Shari'a at all in the workaday world, or a body whose secrets are known only to God. At the same time, people may be stoned or mutilated in the name of this law. The key is the concept of 'religious law'. This is almost a contradiction in terms in our modern conception of the world; 'religion' is faith in a non-material force of some kind, and something we consider internal to the human soul. 'Law' on the other hand, is external to us, established by society in order to regulate the material needs of the community. The contrast between 'religion' and 'law' has been continuous throughout Muslim history. Islamic law has always existed in a tension between these two forces: God, who gave the law, and the state - the 'sultan' - representing society and implementing the law. This tension and dynamic have created a very particular history for the law - in how it was formulated and by whom, in its theoretical basis and its actual rules, and in how it was practised in historical reality from the time of its formation till today. This is the main theme of this book. Knut S. Vikor aims in this book to introduce the development and practice of Islamic law to a wide readership: students, lawyers and the growing number of those interested in Islamic civilization. He summarises the main concepts of Islamic jurisprudence, discusses debates concerning the historicity of Islamic sources of dogma and the dating of early Islamic law; describes the classic practice of the law, in the formulation of legal rules and practice in the courts; and sets out various substantive legal rules, on such vital matters as the family and economic activity.

Colonial Justice in British India White Violence and the Rule of Law

Elizabeth Kolsky

Colonial Justice in British India describes and examines the lesser-known history of white violence in colonial India. By foregrounding crimes committed by a mostly forgotten cast of European characters – planters, paupers, soldiers and sailors – Elizabeth Kolsky argues that violence was not an exceptional but an ordinary part of British rule in the subcontinent. Despite the pledge of equality, colonial legislation and the practices of white judges, juries and police placed most Europeans above the law, literally allowing them to get away with murder. The failure to control these unruly whites revealed how the weight of race and the imperatives of command imbalanced the scales of colonial justice. In a powerful account of this period, Kolsky reveals a new perspective on the British Empire in India, highlighting the disquieting violence that invariably accompanied imperial forms of power.

Law like Love Queer Perspectives on Law

Arvind Narrain
& Alok Gupta (editors)

With the landmark Delhi High Court victory in July 2009, sexuality and the law entered mainstream, legal and public discourse in India inviting both celebration and resistance. How do we understand this conversation? The July judgement stands on the shoulders of a much longer history, argue the writers in this contemporary and critical volume on queering the law. A longer history that shapes, unsettles and challenges both legal and queer histories and begins new conversations on the intersections between bodies, politics, activism, sexuality, identity and law. Some playful, some critical and others reflective and irreverent, this unique collection of pieces brings the life, structures and institutions of law alive and shine with relevance in the contemporary moment.

Nine Degrees of Justice New Perspectives on Violence Against Women in India

Bishakha Datta (editor)

From an early focus on rape, dowry and sati, feminist struggles against violence on women in India have traversed a wide terrain to include issues that were invisible in the 1980s. In *Nine Degrees of Justice*, second- and third-generation feminists share their perceptions on violence against women through a series of thought-provoking essays that establish that justice for women has not even reached double digit figures (hence nine degrees). Has using the law led to justice for women who face violence? What does 'justice' mean for an individual survivor? How can we address violence in public spaces and cyberspace without demonizing either? How do women in armed conflict move from being victims to actors? How can we start to speak about lesbian suicides and violence among women loving women? How do we ensure that women have a 'right to choose' when love is seen as a crime? Is prostitution a form of violence against women? What is the violence of stigma? And who is a 'woman' deserving representation from the women's movement?

Asian Journal of International Law

The *Asian Journal of International Law* (*AsianJIL*) is the journal of the Asian Society of International Law (*AsianSIL*).

AsianJIL publishes peer-reviewed scholarly articles and book reviews on public and private international law. The regional focus is broadly conceived. Some articles may focus specifically on Asian issues; others will bring one of the many Asian perspectives to bear on issues of global concern. Still others will be of more general interest to scholars, practitioners, and policymakers located in or working on Asia.
